

Compare at least six anti-virus / anti-malware solutions. These solutions must be enterprise / business solutions, not home or consumer versions.
Identify the country of origin for each solution.

You will prepare a 4 to 6 page paper with your findings.

You will also prepare a one page executive summary.

This assignment is due November 30th..

May be done in groups of two or three.

Here are your needs:

- 25 workstations
- 2 servers
- Needs to have a central management console for deployment and reporting purposes.
Identify and use at least 3 legitimate anti-virus testing / comparative sites.

Sites like top10antivirussoftware.com are not legitimate.

After your comparison, you will choose the best solution and explain your choice.

Your comparisons and solution may NOT contain AVG, Norton, or McAfee.
